HIGH-SPEED MULTI-AXIS MILLING & TURNING.

Using the most advanced CNC machine tools outfitted with cutting-edge accessories, Gupta Permold's Machining Division processes jobs quickly and economically, reducing cycle times and passing those savings on to you. Our multi-axis machining capability allows us to reduce the number of setups to give you a lower cost part and a quicker delivery.

RAPID TURNAROUND.

Cost effective parts are no help to your operation if they are late. Gupta Permold offers and promises competitive delivery to suit your demanding production schedule. We also can offer rush order programs to get you out of jams, and as an added bonus, offer a very popular JIT program which allows you to buy production volumes of parts in days rather than weeks, and sometimes even in hours!

AGGRESSIVE PRICING.

Gupta Permold's Machining Division does its best to never be underbid by the competition. Our state-of-the-art CNC equipment and highly innovative engineering enable us to analyze and produce jobs uniquely and give you the lowest cost part possible.

ISO 9000 QUALITY SYSTEM.

The Machining Division's focus on quality is unparalleled when compared to other machine shops. Each and every part undergoes final inspection before it reaches your docks. In fact, QA technicians constantly roam the shop floor checking shop activities. This, along with strict incoming inspection and a detailed manufacturing procedure documentation program are just some of the ways we ensure you'll never have the occasion to reject a single part.

SINGLE SOURCE RESPONSIBILITY.

Whatever your specific project demands: casting, heat-treating, welding, vibratory finishing, plating, chemical film, powder-coating, polishing, wet painting, blasting, functional testing, parts washing, dimensional layout, NDT, assembly, etc...Gupta Permold is anxious to listen to your requirements and thoroughly advise you of ways to make your requirements more beneficial to you. We take full, unequivocal responsibility for any outsourcing possibly needed on a project; you won't have to manage our vendors in addition to yours. You pay us to take your manufacturing headaches away; we see it as our job to do just that!

With all of the time and money you invest each and every day into making your product the best it can be, why would you entrust the manufacturing to anyone else but the best? After all, it's your name on the box! So whatever your contract manufacturing needs might be, allow Gupta Permold's world-class staff and facility the privilege of working on your next project...and *Gain the Advantage!*
